

CANADIAN JOURNAL OF MICROBIOLOGY, VOLUME 15 (1969)

Date of Issue

Canadian Journal of Microbiology, Volume 15 (1969), Numbers 1-12

This date, for each number of Volume 15, will be published in the first issue of Volume 16 (Number 1, January 1970).

Author Index

Under each name are listed, in chronological order of publication, all articles in which an author has participated.

- Abbasi, K. M.**
Berberine sulfate: antimicrobial activity, bioassay, and mode of action. A. H. Amin, T. V. Subbaiah, and K. M. Abbasi, 1067.
- Abd-El-Al, A. T. H.**
Purification and properties of endo- β -glucanase in the yeast *Hanseniaspora valbyensis*. A. T. H. Abd-El-Al and H. J. Phaff, 697.
- Ackermann, H.-W.**
Ultrastructure des phages de lysotypie des *Escherichia coli* 0127:B8. H.-W. Ackermann and L. Berthiaume, 859.
- Adair, F. W.**
Chemoautotrophic sulfur bacteria in the marine environment. I. Isolation, cultivation, and distribution. F. W. Adair and K. Gundersen, 345.
Chemoautotrophic sulfur bacteria from the marine environment. II. Characterization of an obligately marine facultative autotroph. F. W. Adair and K. Gundersen, 355.
- Adams, G. A.**
Cell wall lipopolysaccharides from *Neisseria catarrhalis*. G. A. Adams, T. G. Tornabene, and M. Yaguchi, 365.
- Agate, A. D.**
Extracellular complex from the culture filtrate of *Ferrobacillus ferrooxidans*. A. D. Agate, M. S. Korczynski, and D. G. Lundgren, 259.
- Agnihotri, V. P.**
Some nutritional and environmental factors affecting growth and production of sclerotia by a strain of *Aspergillus niger*. V. P. Agnihotri, 835.
Stimulation of *Waitea circinata* by root exudates of *Pinus cembroides*. V. P. Agnihotri and O. Vaartaja, 1319.
- Akagi, J. M.**
Thermostability of glycolytic enzymes from thermophilic clostridia. N. Howell, J. M. Akagi, and R. H. Himes, 461.
- Alam, A. U.**
Growth of *Escherichia coli* on some organophosphonic acids. A. U. Alam and S. H. Bishop, 1043.
- Albright, L. J.**
Alternate pressurization-depressurization effects on growth and net protein, RNA and DNA synthesis by *Escherichia coli* and *Vibrio marinus*. L. J. Albright, 1237.
- Alldridge, N.**
The effect of gibberellic acid on *Hansenula wingei*. E. H. Makarewicz and N. Alldridge, 1225.
- Allen, O. N.**
Method for determining *Bacillus thuringiensis* var. *thuringiensis* Berliner in soil. S. M. Saleh, R. F. Harris, and O. N. Allen, 1101.
- Altenbern, R. A.**
A survey of genomic maps in strains of *Staphylococcus aureus*. R. A. Altenbern, 959.
- Amin, A. H.**
Berberine sulfate: antimicrobial activity, bioassay, and mode of action. A. H. Amin, T. V. Subbaiah, and K. M. Abbasi, 1067.
- Andersen, K. J.**
Enzymatic studies of the iron-oxidizing bacterium, *Ferrobacillus ferrooxidans*: evidence for a glycolytic pathway and Krebs cycle. K. J. Andersen and D. G. Lundgren, 73.
- Anderson, J. A.**
The effect of isonicotinic acid hydrazide on clavine alkaloid biosynthesis. J. C. Hsu and J. A. Anderson, 781.
- Appelgarth, D. A.**
The preparation and visualization of cell walls of hyphal fungi. D. A. Appelgarth, G. Bozoian, and B. Zintel, 312.
- Arie, B.**
Gaffkemia, a bacterial disease of the lobster, *Homarus americanus*: effects of the pathogen, *Gaffkya homari*, on the physiology of the host. J. E. Stewart, B. Arie, B. M. Zwicker, and J. R. Dingle, 925.
- Ashton, D. H.**
Soluble reduced nicotinamide adenine dinucleotide oxidase from *Bacillus cereus* T spores and vegetative cells. I. Purification. D. H. Ashton and L. C. Blankenship, 1309.
Soluble reduced nicotinamide adenine dinucleotide oxidase from *Bacillus cereus* T spores and vegetative cells. II. Properties. D. H. Ashton and L. C. Blankenship, 1313.

Aston, P. R.

Comparative studies on succinate and terminal oxidase activity in microbial and mammalian electron-transport systems. P. Jurtschuk, A. K. May, L. M. Pope, and P. R. Aston, 797.

Aube, C.

Effect of carbon and nitrogen nutrition on growth and sporulation of *Trichoderma viride* Pers. ex Fries. C. Aube and C. Gagnon, 703.

Bailey, G. D.

Effect of relative humidity on the stability of *Mycoplasma pneumoniae* exposed to simulated solar ultraviolet and to visible radiation. D. N. Wright and G. D. Bailey, 1449.

Banerjee, A. B.

D-Amino acids in yeast cell pool. S. K. Bhattacharyya and A. B. Banerjee, 1107.

Banić, S.

Observations on the decreasing frequency of multiply resistant strains of *Shigella sonnei*. J. Zajc-Satler, M. Grabnar, and S. Banić, 1305.

Barrens, M.

The effect of superinfection by T4r⁺ coliphage on the deoxyribonucleases of induced *Escherichia coli* Y10 (λ). R. C. French and M. Barrens, 9.

Barrera, C. R.

The use of Sephadex for the electrophoretic resolution and partial purification of β-hydroxybutyric and isocitric dehydrogenases of *Azotobacter vinelandii*. P. Jurtschuk, C. R. Barrera, and S. Manning, 321.

Bartley, C. H.

Correlation of virulence with growth rate in *Staphylococcus aureus*. W. R. Chesbro, L. Wamola, and C. H. Bartley, 723.

Bautista, E. M.

Degradation of benzene hexachloride by a soil bacterium. N. Sethunathan, E. M. Bautista, and T. Yoshida, 1349.

Beam, R. E.

Lysogeny in the mycobacteria. II. Alterations of bacterial antigens mediated by mycobacteriophage. W. D. Jones, Jr. and R. E. Beam, 1112.

Bean, G. A.

Fatty acids of the mycelia and conidia of *Fusarium oxysporum* and *Fusarium roseum*. G. W. Rambo and G. A. Bean, 967.

Becker, R. R.

Some factors affecting association-dissociation of β-galactosidase from *Streptococcus lactis*. G. A. McFeters, W. E. Sandine, R. R. Becker, and P. R. Elliker, 105.

Beeman, E. A.

Inhibition by ethionine of the growth of *Neurospora crassa*. E. A. Beeman and R. C. Smith, 445.

Behal, F. J.

α-Glutamic acid-β-naphthylamidase from *Neisseria catarrhalis*. S. T. Cox and F. J. Behal, 1293.

Bernheim, F.

The effect of streptomycin on cell size of a strain of *Pseudomonas aeruginosa*. F. Bernheim, 209.

Bernstein-Ziv, R.

Cell division in *Mycoplasma gallisepticum*. R. Bernstein-Ziv, 1125.

Berthiaume, L.

Ultrastructure des phages de lysotypie des *Escherichia coli* 0127:B8. H.-W. Ackermann and L. Berthiaume, 859.

Betz, J. V.

Structure of the proximal ends of flagella of *Clostridium sporogenes*. J. V. Betz, 761.

Bhattacharyya, S. K.

D-Amino acids in yeast cell pool. S. K. Bhattacharyya and A. B. Banerjee, 1107.

Bird, O. D.

A microbiological assay system for naturally occurring folates. O. D. Bird, V. M. McGlohon, and J. W. Vaitkus, 465.

Bishop, S. H.

Growth of *Escherichia coli* on some organophosphonic acids. A. U. Alam and S. H. Bishop, 1043.

Bismanis, J. E.

Comparative examinations of virulent *Corynebacterium kutscheri* and its presumed avirulent variant. D. L. Bruce, J. E. Bismanis, and J. M. Vickerstaff, 817.

Blackmore, R. W.

Aldehyde dehydrogenase in pseudomonads. W. E. Razzell and R. W. Blackmore, 645.

Blackwood, A. C.

Simultaneous production of three phenazine pigments by *Pseudomonas aeruginosa* Mac 436. P. C. Chang and A. C. Blackwood, 439.

Use of coumarin by soil fungi. H. S. Shieh and A. C. Blackwood, 647.

Blake, H. E.

Intracerebral mouse protection test for pertussis vaccine. II. Immunosuppression with cyclophosphamide. H. E. Blake and A. C. Wardlaw, 1355.

Inability of cyclophosphamide to inhibit the action of pertussis HSF in mice. H. E. Blake, 1463.

Blakley, E. R.

A comparative study in vivo of enzyme activities in batch, continuous, and phased cultures of a pseudomonad grown on phenylacetic acid. W. G. W. Kurz, P. S. S. Dawson, and E. R. Blakley, 27.

Blankenship, L. C.

Soluble reduced nicotinamide adenine dinucleotide oxidase from *Bacillus cereus* T spores and vegetative cells. I. Purification. D. H. Ashton and L. C. Blankenship, 1309.

- Soluble reduced nicotinamide adenine dinucleotide oxidase from *Bacillus cereus* T spores and vegetative cells. II. Properties. D. H. Ashton and L. C. Blankenship, 1313.
- Blevins, W. T.**
Growth and macromolecular biosynthesis by *Micrococcus sodonensis* during the utilization of glucose and lactate. W. T. Blevins, J. J. Perry, and J. B. Evans, 383.
- Bounds, H. C.**
The reversal of Dalapon toxicity by microbial action. H. C. Bounds, L. A. Magee, and A. R. Colmer, 1121.
- Bovallius, Å.**
Production of a cholinesterase-solubilizing factor from a *Cytophaga* by continuous cultivation. Å. Bovallius, 429.
- Bøvre, K.**
DNA base composition of *Neisseria*, *Moraxella*, and *Acinetobacter*, as determined by measurement of buoyant density in CsCl gradients. K. Bøvre, M. Fiandt, and W. Szybalski, 335.
- Bowie, I. S.**
Identification of aerobic heterotrophic soil bacteria to generic level by using multipoint inoculation techniques. I. S. Bowie, M. W. Loutit, and J. S. Loutit, 297.
- Bozoian, G.**
The preparation and visualization of cell walls of hyphal fungi. D. A. Applegarth, G. Bozoian, and B. Zintel, 312.
- Brazeau, M.**
Le bactériologiste clinique face à un problème de classification: *Moraxella*, *Achromobacter*, *Acinetobacter*. A. Leduc, J. Fontaine, M. Brazeau, L. C. Parisset, and S. Montplaisir, 655.
- Brezina, O.**
Growth repression of *Mycobacterium tuberculosis* in the presence of Krebs cycle intermediates and some other substrates. O. Brezina, I. Drobnicová, and L. Drobnica, 1267.
- Bridgens, J. G.**
Notes on *Pasteurella tularensis* isolated from a vole, *Microtus oeconomus* Pallus, in Alaska. R. L. Rausch, B. E. Huntley, and J. G. Bridgens, 47.
- Brooks, J. B.**
Gas chromatographic analysis of amines and other compounds produced by several species of *Clostridium*. J. B. Brooks and W. E. C. Moore, 1433.
- Brouzes, R.**
The effect of organic amendment, water content, and oxygen on the incorporation of $^{15}\text{N}_2$ by some agricultural and forest soils. R. Brouzes, J. Lasik, and R. Knowles, 899.
- Bruce, D. L.**
Comparative examinations of virulent *Corynebacterium kutscheri* and its presumed avirulent variant. D. L. Bruce, J. E. Bismanis, and J. M. Vickerstaff, 817.
- Brüss, E.**
The influence of *Bordetella pertussis* on the preparation of mouse spleens for the secondary immune response. H. Finger, P. Emmerling, and E. Brüss, 814.
- Bryant, M. P.**
Isolation and identification of rumen bacteria capable of anaerobic rutin degradation. K.-J. Cheng, G. A. Jones, F. J. Simpson, and M. P. Bryant, 1365.
- Budd, K.**
The assimilation of bicarbonate by *Neocosmospora vasinfecta*. K. Budd, 389.
- Bu'Lock, J. D.**
Regulation of 6-methylsalicylate and patulin synthesis in *Penicillium urticae*. J. D. Bu'Lock, D. Shepherd, and D. J. Winstanley, 279.
- Campbell, J. B.**
Plaque assay and some characteristics of Egtved virus (virus of viral hemorrhagic septicemia of rainbow trout). J. B. Campbell and K. Wolf, 635.
- Campbell, J. J. R.**
Evaluation of shikimic acid as a precursor of pyocyanine. W. M. Ingledew and J. J. R. Campbell, 535.
A new resuspension medium for pyocyanine production. W. M. Ingledew and J. J. R. Campbell, 595.
Utilization of dicarboxylic acids by *Pseudomonas aeruginosa*. N. P. Tiwari and J. J. R. Campbell, 1095.
- Campbell, N. E. R.**
Use of Pankhurst tubes to assay acetylene reduction by facultative and anaerobic nitrogen-fixing bacteria. N. E. R. Campbell and H. J. Evans, 1342.
- Carpenter, J. A.**
Some observations on the physiology of *Erwinia herbicola* and its possible implication as a factor antagonistic to *Erwinia amylovora* in the "fire-blight" syndrome. A. K. Chatterjee, L. N. Gibbins, and J. A. Carpenter, 640.
- Carroll, K. K.**
Factors affecting the yield and biological activity of lipid extracts of *Listeria monocytogenes*. R. A. Tadayon, K. K. Carroll, and R. G. E. Murray, 421.
- Carver, D. D.**
Sulfatase regulation and antibiotic synthesis in *Cephalosporium acremonium*. D. W. Dennen and D. D. Carver, 175.
- Casselton, L. A.**
Isocitrate lyase in *Coprinus lagopus* (sensu Buller). P. J. Casselton, M. O. Fawole, and L. A. Casselton, 637.
- Casselton, P. J.**
Isocitrate lyase in *Coprinus lagopus* (sensu Buller). P. J. Casselton, M. O. Fawole, and L. A. Casselton, 637.
- Chadha, K. C.**
Influence of temperature upon levels of virus and induced antiviral principle in tomato plants systemically infected with tobacco mosaic virus. K. C. Chadha and B. H. MacNeill, 1469.

- Chagnon, A.**
Characteristics of a *Mycoplasma hyorhinis* strain contaminating a human fetal diploid cell line. J. Joncas, A. Chagnon, G. Lussier, and V. Pavilanis, 451.
Hemagglutination-inhibition rubella antibody determination. A. Chagnon and V. Pavilanis, 962.
- Chan, E. C. S.**
Distribution, characterization, and nutrition of marine microorganisms from the algae *Polysiphonia lanosa* and *Ascophyllum nodosum*. E. C. S. Chan and E. A. McManus, 409.
- Chandra, T.**
Astringency in fruits. I. Microbial degradation of catechin. T. Chandra, W. Madhavakrishna, and Y. Nayudamma, 303.
- Chang, P. C.**
Simultaneous production of three phenazine pigments by *Pseudomonas aeruginosa* Mac 436. P. C. Chang and A. C. Blackwood, 439.
- Chapman, G. B.**
Properties of *Pseudomonas iodinum*. R. R. Colwell, R. V. Citarella, I. Ryman, and G. B. Chapman, 851.
- Chatterjee, A. K.**
Some observations on the physiology of *Erwinia herbicola* and its possible implication as a factor antagonistic to *Erwinia amylovora* in the "fire-blight" syndrome. A. K. Chatterjee, L. N. Gibbins, and J. A. Carpenter, 640.
- Chaudhary, R. K.**
Plaque assay of poliovirus in plastic chambers. R. K. Chaudhary and J. C. N. Westwood, 1301.
- Cheng, K.-J.**
Isolation and identification of rumen bacteria capable of anaerobic rutin degradation. K.-J. Cheng, G. A. Jones, F. J. Simpson, and M. P. Bryant, 1365.
- Chernesky, M. A.**
Powassan virus transmission by ixodid ticks infected after feeding on viremic rabbits injected intravenously. M. A. Chernesky, 521.
Localization of Powassan virus in *Dermacentor andersoni* ticks by immunofluorescence. M. A. Chernesky and D. M. McLean, 1399.
- Chesbro, W. R.**
Correlation of virulence with growth rate in *Staphylococcus aureus*. W. R. Chesbro, L. Wamola, and C. H. Bartley, 723.
- Child, J. J.**
Induction de l'oogénèse par les antibiotiques polyéniques et interaction avec le cholestérol chez un *Pythium* sp. PRL 2142. G. Défago, J. J. Child, and R. H. Haskins, 509.
The effect of cholesterol and polyene antibiotics on the permeability of the protoplasmic membrane of *Pythium* PRL 2142. J. J. Child, G. Défago, and R. H. Haskins, 599.
- Chow, C. T.**
Properties of a *Pseudomonas aeruginosa* bacteriophage ϕ -MC. C. T. Chow and T. Yamamoto, 1179.
- Chu, D. T.-H.**
Survival and mineralization and immobilization of ^{15}N -labelled *Serratia* cells in a boreal forest raw humus. R. Knowles and D. T.-H. Chu, 223.
- Citarella, R. V.**
Properties of *Pseudomonas iodinum*. R. R. Colwell, R. V. Citarella, I. Ryman, and G. B. Chapman, 851.
- Clademenos, T.**
Influence of refrigeration on aflatoxin production by strains of *Aspergillus flavus*. W. van Walbeek, T. Clademenos, and F. S. Thatcher, 629.
- Clark, J. A.**
The detection of various bacteria indicative of water pollution by a presence-absence (P-A) procedure. J. A. Clark, 771.
- Clayton, D.**
Enhanced resistance to arboviruses of mice with persistent lymphocytic choriomeningitis virus infection. V. Lewis and D. Clayton, 1468.
- Cole, B. C.**
Characterization of *Haemophilus vaginalis*, *Corynebacterium cervicis*, and related bacteria. J. M. Vickerstaff and B. C. Cole, 587.
- Coler, R. A.**
The rhizosphere of an aquatic plant (*Lemna minor*). R. A. Coler and H. B. Gunner, 964.
- Collins, O. R.**
Effects of two mutations on production of a red plasmodial pigment in the myxomycete *Didymium iridis*. O. R. Collins and B. A. Erlebach, 1245.
- Colmer, A. R.**
The reversal of Dalapon toxicity by microbial action. H. C. Bounds, L. A. Magee, and A. R. Colmer, 1121.
- Colwell, R. R.**
Properties of *Pseudomonas iodinum*. R. R. Colwell, R. V. Citarella, I. Ryman, and G. B. Chapman, 851.
- Cooke, R. C.**
Evidence against involvement of pectic enzymes in the invasion of root hairs by *Rhizobium trifolii*. J. D. Macmillan and R. C. Cooke, 643.
- Corke, C. T.**
Persistence and effects of some chlorinated anilines on nitrification in soil. F. R. Thompson and C. T. Corke, 791.
- Corpe, W. A.**
Extracellular enzymes produced by a *Pseudomonas* sp. and their effect on cell envelopes of *Chromobacterium violaceum*. T. L. Whiteside and W. A. Corpe, 81.

- Cox, S. T.
 α -Glutamic acid- β -naphthylamidase from *Neisseria catarrhalis*. S. T. Cox and F. J. Behal, 1293.
- Cserjesi, A. J.
 Toxicity and biodegradation of dihydroquercetin. A. J. Cserjesi, 1137.
- Cummings, J. M.
 Alteration in the multiplication of *Staphylococcus aureus* by Enovid. W. W. Yotis and J. M. Cummings, 247.
- Curren, T.
 Pectic and cellulolytic enzymes of *Stemphyllium radicinum*. T. Curren, 1241.
- Curtis, C. R.
 Photoinduced perithecial formation by *Nectria haematococca* on media containing either L-tyrosine; L-phenylalanine; or D-glucose + NaNO₃ as sole carbon and nitrogen sources. C. R. Curtis, 863.
- Daniel, P.
 Caractères culturels inhabituels d'une souche d'herpesvirus hominis. P. Daniel, 977.
- Davis, F. W. J.
 Alkaline phosphatases of *Neurospora crassa*. Part I. F. W. J. Davis and H. Lees, 455.
- Dawson, P. S. S.
 A comparative study in vivo of enzyme activities in batch, continuous, and phased cultures of a pseudomonad grown on phenylacetic acid. W. G. W. Kurz, P. S. S. Dawson, and E. R. Blakley, 27.
- Défago, G.
 Induction de l'oogénèse par les antibiotiques polyéniques et interaction avec le cholestérol chez un *Pythium* sp. PRL 2142. G. Défago, J. J. Child, and R. H. Haskins, 509.
 The effect of cholesterol and polyene antibiotics on the permeability of the protoplasmic membrane of *Pythium* PRL 2142. J. J. Child, G. Défago, and R. H. Haskins, 599.
- Dennen, D. W.
 Sulfatase regulation and antibiotic synthesis in *Cephalosporium acremonium*. D. W. Dennen and D. D. Carver, 175.
- de Repentigny, J.
 Tryptophan metabolism and toxin formation in *Staphylococcus aureus* Wood 46 strain. T. Leboeuf-Trudeau, J. de Repentigny, R. M. Frenette, and S. Sonea, 1.
 Growth inhibition of a *Staphylococcus aureus* aminopterin-derived thymineless mutant by exogenous nucleosides in the presence of thymine. L. G. Mathieu, J. de Repentigny, S. Turgeon, and S. Sonea, 820.
- Despreaux, C. W., Jr.
 Sources of alcohol dehydrogenase (NAD⁺-linked) in the cockroach, *Leucophaea maderae*. C. W. Despreaux, Jr. and L. L. Pierre, 257.
- Detroy, R. W.
 Transformation of aflatoxin B₁ by steroid-hydroxylating fungi. R. W. Detroy and C. W. Hesseltine, 495.
- Dingle, J. R.
 Gaffkemia, a bacterial disease of the lobster, *Homarus americanus*: effects of the pathogen, *Gaffkya homari*, on the physiology of the host. J. E. Stewart, B. Arie, B. M. Zwicker, and J. R. Dingle, 925.
- Dobos, P.
 Characterization of a cytoplasmic fraction from Sindbis virus-infected cultures. P. Dobos and P. Faulkner, 215.
- Donahue, J. A.
 Antistaphylococcal hemolysins and delta hemolysin inhibitor in adult human serum. J. A. Donahue, 957.
- Drobnica, L.
 Growth repression of *Mycobacterium tuberculosis* in the presence of Krebs cycle intermediates and some other substrates. O. Brezina, I. Drobnicová, and L. Drobnica, 1267.
- Drobnicová, I.
 Growth repression of *Mycobacterium tuberculosis* in the presence of Krebs cycle intermediates and some other substrates. O. Brezina, I. Drobnicová, and L. Drobnica, 1267.
- Duncan, C. L.
 Experimental production of diarrhea in rabbits with *Clostridium perfringens*. C. L. Duncan and D. H. Strong, 765.
- Duncan, D. W.
 Growth of *Thiobacillus ferrooxidans* on various substrates. C. J. M. McGoran, D. W. Duncan, and C. C. Walden, 135.
- Eagon, R. G.
 Cell wall-associated inorganic substances from *Pseudomonas aeruginosa*. R. G. Eagon, 235.
 Characterization of a protein-lipopolysaccharide complex released from cell walls of *Pseudomonas aeruginosa* by ethylenediaminetetraacetic acid. S. W. Rogers, H. E. Gilleland, Jr., and R. G. Eagon, 743.
- Elkan, G. H.
 Deoxyribonucleic acid base composition of isolates of *Rhizobium japonicum*. G. H. Elkan, 490.
- Elliker, P. R.
 Some factors affecting association-dissociation of β -galactosidase from *Streptococcus lactis*. G. A. McFeters, W. E. Sandine, R. R. Becker, and P. R. Elliker, 105.
- Emmerling, P.
 The influence of *Bordetella pertussis* on the preparation of mouse spleens for the secondary immune response. H. Finger, P. Emmerling, and E. Brüss, 814.
- Eng, C. P.
 Antigenic relationships of various fractions of the Ehrlich ascites tumor investigated by different immunoserological methods. C. P. Eng, J. A. Hindmarsh, and J. F. Morgan, 1085.
 Heterophile antigens in Ehrlich ascites fluid. C. P. Eng, J. A. Hindmarsh, and J. F. Morgan, 1409.
- Erlebacher, B. A.
 Effects of two mutations on production of a red plasmodial pigment in the myxomycete *Didymium iridis*. O. R. Collins and B. A. Erlebacher, 1245.

- Evans, H. C.**
The effect of growth temperature on the fatty acid composition of fungi in the order Mucorales. J. L. Sumner, E. D. Morgan, and H. C. Evans, 515.
- Evans, H. J.**
Use of Pankhurst tubes to assay acetylene reduction by facultative and anaerobic nitrogen-fixing bacteria. N. E. R. Campbell and H. J. Evans, 1342.
- Evans, J. B.**
Growth and macromolecular biosynthesis by *Micrococcus sodonensis* during the utilization of glucose and lactate. W. T. Blevins, J. J. Perry, and J. B. Evans, 383.
- Farber, P. A.**
Blood clearance of bacteriophage ϕ X 174 in mice: effect of immunosuppressive drugs. P. A. Farber, 1465.
- Fardy, P. W.**
Experimental nephritis due to type specific streptococci. VI. Further characterization of type 12 nephrotoxin. P. W. Fardy, B. H. Matheson, and R. W. Reed, 555.
- Farkas-Himsley, H.**
The relationship of pathogenic coagulase-negative staphylococci to *Staphylococcus aureus*. H. B. H. Smith and H. Farkas-Himsley, 879.
- Faulkner, P.**
Characterization of a cytoplasmic fraction from Sindbis virus-infected cultures. P. Dobos and P. Faulkner, 215.
- Fawole, M. O.**
Isocitrate lyase in *Coprinus lagopus* (sensu Buller). P. J. Casselton, M. O. Fawole, and L. A. Casselton, 637.
- Fenn, W. O.**
Dilatometric study of streptococcal growth and metabolism. R. E. Marquis and W. O. Fenn, 933.
- Fiandt, M.**
DNA base composition of *Neisseria*, *Moraxella*, and *Acinetobacter*, as determined by measurement of buoyant density in CsCl gradients. K. Bøvre, M. Fiandt, and W. Szybalski, 335.
- Finger, H.**
The influence of *Bordetella pertussis* on the preparation of mouse spleens for the secondary immune response. H. Finger, P. Emmerling, and E. Brüss, 814.
- Fontaine, J.**
Le bactériologiste clinique face à un problème de classification: *Moraxella*, *Achromobacter*, *Acinetobacter*. A. Leduc, J. Fontaine, M. Brazeau, L. C. Panisset, and S. Montplaisir, 655.
- Forbes, A. R.**
Mycoplasma-like bodies in the saliva of the leafhopper *Macrostelus fasciifrons* (Stål) (Homoptera:Cicadellidae). J. Raine and A. R. Forbes, 1105.
- Franklin, M.**
Experimental nephritis due to type specific streptococci. V. Attempted use of tissue cultures and mice for the assay of nephrotoxic streptococcal polypeptides. M. Franklin, B. H. Matheson, and R. W. Reed, 543.
- Frei, E.**
Soil fungistasis with respect to pH and profile. H. Schüepp and E. Frei, 1273.
- French, R. C.**
The effect of superinfection by T4⁺ coliphage on the deoxyribonucleases of induced *Escherichia coli* Y10 (λ). R. C. French and M. Barrens, 9.
- Frenette, R. M.**
Tryptophan metabolism and toxin formation in *Staphylococcus aureus* Wood 46 strain. T. Leboeuf-Trudeau, J. de Repentigny, R. M. Frenette, and S. Sonea, 1.
- Frommes, S. P.**
Ultrastructural changes in neutrophils treated with staphylococcal alpha toxin. S. K. Maheswaran, S. P. Frommes, and R. K. Lindorfer, 128.
- Fujii, R. K.**
Surface characteristics of conidia from monosporous cultures of *Penicillium digitatum* and *Aspergillus nidulans* var. *echinulatus*. R. K. Fujii and W. M. Hess, 1472.

The variations in the antigenic composition of *Mycobacterium tuberculosis* during the growth cycle as measured by the passive hemagglutination and precipitation reactions. R. Turcotte, 681.

- Turgeon, S.**
Growth inhibition of a *Staphylococcus aureus* aminopterin-derived thymineless mutant by exogenous nucleosides in the presence of thymine. L. G. Mathieu, J. de Repentigny, S. Turgeon, and S. Sonea, 820.
- Tyrrell, D.**
The fatty acid composition of four entomogenous imperfect fungi. D. Tyrrell, 818.
- Upadhyay, J.**
Radiation survival of bacterial spores in neutral and alkaline ice. J. Upadhyay and N. Grecz, 1419.
- Vaartaja, O.**
Stimulation of *Waitea circinata* by root exudates of *Pinus cembroides*. V. P. Agnihotri and O. Vaartaja, 1319.
- Vaitkus, J. W.**
A microbiological assay system for naturally occurring folates. O. D. Bird, V. M. McGlohon, and J. W. Vaitkus, 465.
- Vakil, J. R.**
Carbohydrate metabolism of lactic acid cultures. III. Glycolytic enzymes of *Streptococcus lactis* and their sensitivity to antibiotics. J. R. Vakil and K. M. Shahani, 753.
- Van Caesele, L.**
The ultrastructures of autotrophically and heterotrophically grown *Thiobacillus novellus*. L. Van Caesele and H. Lees, 651.
- van Walbeek, W.**
Influence of refrigeration on aflatoxin production by strains of *Aspergillus flavus*. W. van Walbeek, T. Clademenos, and F. S. Thatcher, 629.
Penicillium viridicatum Westling: a new source of ochratoxin A. W. van Walbeek, P. M. Scott, J. Harwig, and J. W. Lawrence, 1281.
- Vázquez, C. G.**
Morphological transformations and lysis of *Halobacterium salinarum* by 4-(2,4-dichlorophenoxy)butyric acid and related compounds. M. Rodríguez-Rebollo and C. G. Vázquez, 309.
- Verrett, M. J.**
Production of aflatoxin by *Aspergillus wentii* Wehmer. H. W. Schroeder and M. J. Verrett, 895.
- Vickerstaff, J. M.**
Characterization of *Haemophilus vaginalis*, *Corynebacterium cervicis*, and related bacteria. J. M. Vickerstaff and B. C. Cole, 587.
Comparative examinations of virulent *Corynebacterium kutscheri* and its presumed avirulent variant. D. L. Bruce, J. E. Bismanis, and J. M. Vickerstaff, 817.
- Volesky, B.**
Growth of *Graphium* sp. on natural gas. J. E. Zajic, B. Volesky, and A. Wellman, 1231.
- von Rudloff, E.**
Changes produced in hop extract components by yeasts. J. F. T. Spencer, E. von Rudloff, and D. W. S. Westlake, 1381.
- Walden, C. C.**
Growth of *Thiobacillus ferrooxidans* on various substrates. C. J. M. McGoran, D. W. Duncan, and C. C. Walden, 135.
- Walsh, N. J.**
Antimicrobial effects of anacardic acids. J. L. Gellerman, N. J. Walsh, N. K. Werner, and H. Schlenk, 1219.
- Wamola, I.**
Correlation of virulence with growth rate in *Staphylococcus aureus*. W. R. Chesbro, L. Wamola, and C. H. Bartley, 723.
- Wang, H. L.**
Milk-clotting activity of proteinases produced by *Rhizopus*. H. L. Wang, D. I. Ruttle, and C. W. Hesseltine, 99.
- Wardlaw, A. C.**
Intracerebral mouse protection test for pertussis vaccine. II. Immunosuppression with cyclophosphamide. H. E. Blake and A. C. Wardlaw, 1355.
- Watson, K.**
Oxidative phosphorylation and respiratory control in mitochondria from *Aspergillus oryzae*. K. Watson, W. Paton, and J. E. Smith, 975.
- Wayman, M.**
The effect of air pressure on the growth of *Candida lipolytica* on *n*-hexadecane. M. Wayman and E. Wein, 1255.
- Webb, T. S.**
Preparation of a purified adenovirus diagnostic antigen by gel filtration. J. R. Polley and T. S. Webb, 1167.
- Weber, J.**
Light and electron microscopy of virus-associated, intranuclear paracrystals in cultured cells infected with types 2, 4, 6, and 18 human adenoviruses. J. Weber and S. K. Liao, 841.
Cytopathogenicity and replication of human adenovirus type 6 in cultured bovine cells. S. K. Liao and J. Weber, 847.
- Wein, E.**
The effect of air pressure on the growth of *Candida lipolytica* on *n*-hexadecane. M. Wayman and E. Wein, 1255.
- Weinberg, E. D.**
Tolerance of yeasts to zinc: distinction between cell growth and cell longevity. J. F. Steenberg, S. M. Steenberg, and E. D. Weinberg, 229.

- Wellman, A.**
Growth of *Graphium* sp. on natural gas. J. E. Zajic, B. Volesky, and A. Wellman, 1231.
- Wensley, R. N.**
Experiments in biological and chemical control of *Fusarium* wilt (*F. oxysporum* f. *melonis* (Leach and Currence) Snyd. and Hans.) of muskmelon. R. N. Wensley, 917.
- Werner, N. K.**
Antimicrobial effects of anacardic acids. J. L. Gellerman, N. J. Walsh, N. K. Werner, and H. Schlenk, 1219.
- Westlake, D. W. S.**
Metabolism of rutin by *Polyporus versicolor* PRL 572. M. A. Pickard and D. W. S. Westlake, 869.
Changes produced in hop extract components by yeasts. J. F. T. Spencer, E. von Rudloff, and D. W. S. Westlake, 1381.
- Westwood, J. C. N.**
Plaque assay of poliovirus in plastic chambers. R. K. Chaudhary and J. C. N. Westwood, 1301.
Immunodiffusion studies on the myxoviruses. II. Identification of influenza A/PR8 precipitins in the serum of normal rabbits. C. M. Johnson and J. C. N. Westwood, 1333.
- Whiteside, T. L.**
Extracellular enzymes produced by a *Pseudomonas* sp. and their effect on cell envelopes of *Chromobacterium violaceum*. T. L. Whiteside and W. A. Corpe, 81.
- Wilt, J. C.**
The significance of antibody to the psittacosis-L.G.V. group antigen. H. Wyman, C. Rigby, J. C. Wilt, and J. A. Hildes, 1173.
- Winstanley, D. J.**
Regulation of 6-methylsalicylate and patulin synthesis in *Penicillium urticae*. J. D. Bu'Lock, D. Shepherd, and D. J. Winstanley, 279.
- Witter, L. D.**
The influence of temperature on the pathways of glucose catabolism in *Pseudomonas fluorescens*. S. A. Palumbo and L. D. Witter, 995.
- Wolf, K.**
Plaque assay and some characteristics of Egtved virus (virus of viral hemorrhagic septicemia of rainbow trout). J. B. Campbell and K. Wolf, 635.
- Wolin, E. A.**
Anaerobic degradation of some bioflavonoids of microflora of the rumen. F. J. Simpson, G. A. Jones, and E. A. Wolin, 972.
- Wood, F. A.**
A broad-spectrum antibiotic produced by a species of *Cryptosporiopsis*. M. A. Stillwell, F. A. Wood, and G. M. Strunz, 501.
- Wright, D. N.**
Effect of relative humidity on the stability of *Mycoplasma pneumoniae* exposed to simulated solar ultraviolet and to visible radiation. D. N. Wright and G. D. Bailey, 1449.
- Wyman, H.**
The significance of antibody to the psittacosis-L.G.V. group antigen. H. Wyman, C. Rigby, J. C. Wilt, and J. A. Hildes, 1173.
- Yaguchi, M.**
Cell wall lipopolysaccharides from *Neisseria catarrhalis*. G. A. Adams, T. G. Tornabene, and M. Yaguchi, 365.
- Yamamoto, T.**
Properties of a *Pseudomonas aeruginosa* bacteriophage ϕ -MC. C. T. Chow and T. Yamamoto, 1179.
- Yamamura, Y.**
Mode of action of viomycin on *Rhizobium meliloti*. D. C. Jordan, Y. Yamamura, and M. E. McKague, 1005.
- Yarosh, W.**
A micro tissue culture test for the titration and neutralization of rubella virus. J. Furesz, P. Moreau, and W. Yarosh, 67.
- Yoshida, T.**
Degradation of benzene hexachloride by a soil bacterium. N. Sethunathan, E. M. Bautista, and T. Yoshida, 1349.
- Yotis, W. W.**
Alteration in the multiplication of *Staphylococcus aureus* by Enovid. W. W. Yotis and J. M. Cummings, 247.
- Zajc-Satler, J.**
Observations on the decreasing frequency of multiply resistant strains of *Shigella sonnei*. J. Zajc-Satler, M. Grabnar, and S. Banić, 1305.
- Zajic, J. E.**
Growth of *Graphium* sp. on natural gas. J. E. Zajic, B. Volesky, and A. Wellman, 1231.
- Zemelman, R.**
Penicillinase in urine with high bacterial counts. R. Zemelman, B. Salazar, and E. Rodríguez, 1213.
- Zink, M. W.**
Regulation of NAD-specific alcohol dehydrogenases in *Neurospora crassa*. M. W. Zink, 265.
- Zintel, B.**
The preparation and visualization of cell walls of hyphal fungi. D. A. Applegarth, G. Bozoian, and B. Zintel, 312.
- Zwicker, B. M.**
Gaffkemia, a bacterial disease of the lobster, *Homarus americanus*: effects of the pathogen, *Gaffkya homari*, on the physiology of the host. J. E. Stewart, B. Arie, B. M. Zwicker, and J. R. Dingle, 925.
